

# Sister's Spin

February 18, 2021

Lent--the season that could be called the springtime of the Church. The word itself comes from old words that referred to the lengthening of the days as spring was coming. As we look outside, spring seems months away! But, think about what is happening under all that snow. Those spring bulbs are doing their thing as are the tree roots and eventually, we will see buds and other green things coming up out of the soil. So it is with us in Lent. Something is going on inside us if, with some effort, we remove the things that hinder us from growing. So, think about what the soil of your life needs in order to sprout by Easter and have a fruitful Lent.

-Sister Marcianne
